Our new ProLine® Master Series 8-year water heater is your tool to offer unique new benefits to your customers and to increase the profitability of your business.

ProLine® Family

FROM THE LEADERS IN COMMERCIAL WATER HEATING, WE BRING YOU:

Commercial-Grade Water Heaters for the Home

— INTRODUCING THE —
**A. O. Smith ProLine® Family of
 Commercial-Grade Water Heaters**

Available only from A. O. Smith professional contractors. When it comes to building a tough Commercial-Grade water heater, the keys to success are outstanding components and superior manufacturing capabilities. These two items work together to give A. O. Smith's contractors the ultimate advantage.

ProLine®

ProLine® Master

ProLine® XE
 Voltex Heat Pump

Commercial-Grade Components. Commercial-Grade Water Heaters.

A. O. Smith's ProLine family of water heaters is a wholesale channel exclusive unlike any other water heaters on the market. We know the pride that you take in your business because we share it. That's why we make sure to pack commercial-grade quality into our products and our company as a whole. A. O. Smith is vertically integrated, which means that we oversee and control each step of our commercial-grade water heaters, from engineering to assembling. Our parts are manufactured by our APCOM parts division. APCOM is the industry's largest manufacturer of water heater parts, including thermostats, electric heating elements, gas manifolds and burners, pipe nipples and more.

COMMERCIAL-GRADE GLASS TANK LINING

A. O. Smith's Blue Diamond® glass coating is a patented commercial-grade formula that provides superior tank protection and corrosion resistance compared to the industry standard glass lining. Blue Diamond glass coating blend is formulated in the same lab that creates the protection for our industry-leading commercial product line. Through our long history, we've learned that one size rarely fits all. That's why we customize our signature formula to best meet the needs of every water heater we produce, ensuring long life no matter which A. O. Smith model you choose.

COMMERCIAL-GRADE ELECTRIC ELEMENTS

ProLine Master electric products are outfitted with longer-lasting stainless steel upper and lower elements that are modeled after those used in our industry-leading commercial line.

COMMERCIAL-GRADE FACTORY-INSTALLED PIPE NIPPLES

A. O. Smith's heat trap metal nipple reduces standby heat loss includes commercial-grade PEX lining and zinc coatings. These nipples are the same as those used in our industry-leading commercial product line. They are factory-installed on most models, making water heater installation quicker and easier.

COMMERCIAL-GRADE BRASS DRAIN VALVES

A. O. Smith's brass drain valve is a full-flow tamper-resistant design that is faster draining versus other valve designs. This high-tech valve is the same as those used in our industry-leading commercial product line.

COMMERCIAL-GRADE PEX DIP TUBES

A. O. Smith's PEX cross-linked polymer dip tubes are long-lasting with superior resistance to destructive thermal deterioration and can withstand temperature excursions up to 400 degrees. PEX is the same material used in dip tubes found in our industry-leading commercial product line.

COMMERCIAL-GRADE THERMOSTATS

A. O. Smith ProLine products are outfitted with the same thermostats as many of our industry-leading commercial line.

COMMERCIAL-GRADE DYNACLEAN™ AUTOMATIC SEDIMENT- CLEANING SYSTEM

Automatic self-cleaning action greatly reduces sediment accumulation and maximizes hot water output.

COMMERCIAL-GRADE STAINLESS STEEL CORE ANODE RODS

A. O. Smith's CoreGard™ Anode Protection is provided using anode rods that feature a stainless steel center core that allows the anode to be secured in place, extending the life of the tank. Stainless steel core technology is the same that is used in our industry-leading commercial product line. ProLine Master products have increased anode protection with either longer or multiple anodes, depending on model.
